Good Morning Bob,

We need to be on the same page about Chromalloy in the briefing on NPL sites. We will need to let Carl and Pam know we are reviewing the evidence but since this will likely be a PRP lead site we shouldn't delay making our determination since we have significant documentation. Also remedial management will need to know our projection on fund v. PRP lead for funding requests asap. Thanks.

No, Amy has not yet reviewed the 104(e) responses or the corporate docs for Delta?

Amy has suggested that we hold off spending time on this site until a RPM is assigned to the Site.

Hi Bob,
Has Amy reviewed the 104e's and corporate docs for Delta? Does she have any issues or concerns? Thanks.
